## 1. Authorship Responsibility Form

**The authors attest that:**

- The manuscript has not been previously published and is not currently under consideration for publication elsewhere, nor will the research reported be submitted for publication elsewhere until a final decision has been made as to its acceptability by Clin Exp Vaccine Res. Posting of submitted material on a web-site may be considered prior publication and should be noted in your cover letter.
- The manuscript represents truthful and original work without fabrication, fraud, or plagiarism.
- All authors have made an important scientific contribution to the study and are thoroughly familiar with primary data.
- All authors have read the complete manuscript, take responsibility for the content and completeness of the manuscript, and understand that they share responsibility if the paper, or part of the paper, were found to be faulty or fraudulent.
- Permission has been obtained from the copyright holder to reproduce in the work (in all media, including print and electronic form) material not owned by the authors, and the source has been acknowledged.
- This manuscript contains no violation of any existing copyright or other third-party right or any material of an obscene, indecent, libelous, or otherwise unlawful nature, and to the best of the authors' knowledge, this work does not infringe the rights of others.
- Any formula or dosage given is accurate and will not, if properly followed, injure any person.
- All authors will indemnify and keep indemnified the editors/KAAACI/KAPARD against all claims and expenses (including legal costs and expense) arising from any breach of this warranty and the other warranties on their behalf in this agreement.

## Instructions

**The purpose of this form is to provide readers of your manuscript with information about your other interests that could influence how they receive and understand your work. The form is designed to be completed electronically and stored electronically. It contains programming that allows appropriate data display. Each author should submit a separate form and is responsible for the accuracy and completeness of the submitted information. The form is in four parts.**

### 1. Identifying information.

Enter your full name. If you are NOT the corresponding author please check the box "no" and a space to enter the name of the corresponding author in the space that appears. Provide the requested manuscript information. Double-check the manuscript number and enter it.

### 2. The work under consideration for publication.

This section asks for information about the work that you have submitted for publication. The time frame for this reporting is that of the work itself, from the initial conception and planning to the present. The requested information is about resources that you received, either directly or indirectly (via your institution), to enable you to complete the work. Checking "No" means that you did the work without receiving any financial support from any third party -- that is, the work was supported by funds from the same institution that pays your salary and that institution did not receive third-party funds with which to pay you. If you or your institution received funds from a third party to support the work, such as a government granting agency, charitable foundation or commercial sponsor, check "Yes". Then complete the appropriate boxes to indicate the type of support and whether the payment went to you, or to your institution, or both.

### 3. Relevant financial activities outside the submitted work.

This section asks about your financial relationships with entities in the bio-medical arena that could be perceived to influence, or that give the appearance of potentially influencing, what you wrote in the submitted work. You should disclose interactions with ANY entity that could be considered broadly relevant to the work. For example, if your article is about testing an epidermal growth factor receptor (EGFR) antagonist in lung cancer, you should report all associations with entities pursuing diagnostic or therapeutic strategies in cancer in general, not just in the area of EGFR or lung cancer.

Report all sources of revenue paid (or promised to be paid) directly to you or your institution on your behalf over the 36 months prior to submission of the work. This should include all monies from sources with relevance to the submitted work, not just monies from the entity that sponsored the research. Please note that your interactions with the work's sponsor that are outside the submitted work should also be listed here. If there is any question, it is usually better to disclose a relationship than not to do so.

For grants you have received for work outside the submitted work, you should disclose support ONLY from entities that could be perceived to be affected financially by the published work, such as drug companies, or foundations supported by entities that could be perceived to have a financial stake in the outcome. Public funding sources, such as government agencies, charitable foundations or academic institutions, need not be disclosed. For example, if a government agency sponsored a study in which you have been involved and drugs were provided by a pharmaceutical company, you need only list the pharmaceutical company.

### 4. Other relationships.

Use this section to report other relationships or activities that readers could perceive to have influenced, or that give the appearance of potentially influencing, what you wrote in the submitted work.
